January 27, 2012

Dear Parents:

As you are aware, over the past three years, the cut off points to reach proficiency levels on the New York State Assessments has steadily increased. One of our main goals is to increase the number of students reaching these new proficiency levels.

In the weeks leading up to this year's NYS ELA and Math assessments, the Broadalbin-Perth Middle School will introduce "Focused Fridays."

Focused Fridays will be a 9-week program providing targeted instruction to our students in preparation for the April state assessments. Students will be following a modified schedule, addressing their individual academic needs, one day a week (usually Friday). This schedule will provide increased opportunities to sharpen the skills needed for success.

Students will continue to attend their regular Adventure Team classes during this time. Students will follow their regular schedule Monday through Thursday.

Thank you for your continued support in your child's education.

Wayne E. Bell
